Built for Non-Stop Mining!!

ASUS Exclusive Innovations

■ LED STATUS LIGHT

Mining RX470 is engineered with a vivid LED that indicates when the card is powered and operational, so it takes just a glance to know that all is working well.

■ ASUS FANCONNECT for MINING CARDS

ASUS FanConnect for Mining Cards provides two 4-pin headers for connecting PWM or DC system fans, or both, for optimal system cooling. The energy-efficient PWM path allows your mining setup's thermals to be adjusted according to the temperature of the installed GPUs — ensuring that cooling and power draw precisely match loading.

* The DC connector by default runs the connected fan at maximum speed at all times.

■ DUAL-BALL BEARING FANS

Without the problem of oil drying common in sleeve-bearing fans, the dual-ball bearing fan lasts 2X longer. With reduced friction, it also runs smoother, further improving card lifespan and cooling efficiency.

■ IP5X-CERTIFIED DUST RESISTANCE

ASUS fan design is certified under the International Protection Marking (IP code) as IP5X dust resistant for improved reliability and optimal fan performance, even under severe conditions.

■ AUTO-EXTREME TECHNOLOGY

Industry-only 100% automated production process ensures premium quality
