

P140, NV31, 4Mx32, 128MB, VIDEO IN/OUT, DVI-I, VGA

## HISTORY:

## Page Overview

## A00

- ```

1 31P140 OVERVIEW
2 NV31 AGP Section and AGP connector
3 NV31 FRAMEBUFFER Interface
4 MEMORY Partition C Bits 0..31
5 MEMORY Partition A Bits 31..63
6 MEMORY Partition C Bits 0..31
7 MEMORY Partition A Bits 31..63
8 NV31 DACA, DACB output, SYNC amplifier
  PLL Section
9 PRIMARY DISPLAY (DACA) Filter and DB15 Connector
10 SECONDARY DISPLAY (DACB)
  DACB Multiplexer Filter long DB15 Connector
11 NV31 INTERNAL TMDS Transmitter
  TMDS Backdrive circuit
  Hotplug detection and DVI-I Connector
12 VIDEO CAPTURE Philips 7114 I/O
13 VIDEO IN/OUT, Filter and Connector
  VIDEO INTERNAL Input
14 VIP, DVO, GPIO, FAN Control, and TEMP Sensor Section
15 BIOS Strapping, Serial ROM
16 Power Supply I , NVVDD, 3V3TMDS, TMDSPLLVDD ISL6522
17 Power Supply II , FBVDD/Q, FBVTT ISL6225
18 Power Supply III, A3.3V Linear Reg, Current Share
  EXT_5V and EXT_12V

```

|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| X00:            | INITIAL VERSION                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| X00:            | First Review                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| X00 - 12/04/02: | Updated D30 Diode on Page 16                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| X00 - 12/05/02: | Changed VGA Connectors to Slim, Added Bracket,<br>Added 2X5 Connector for TUNER Card                                                                                                                                                                                                                                                                                                                                                                                               |
| X00 - 12/06/02: | Changed Pri VGA back to Original,<br>Changed Sec VGA to SLIM_DVIMTG, Hooked up 10 Pin Tuner Con<br>Replaced 27Mhz Crystal with low profile version<br>Corrected Error with PGND on 6529 circuit                                                                                                                                                                                                                                                                                    |
| X00 - 12/09/02: | Added C Partition 120 ohm RPacks<br>Changed and Deleted components on all 3 Switchers<br>Deleted Parallel ROM.                                                                                                                                                                                                                                                                                                                                                                     |
| X00 - 12/10/02: | Replaced L26 and L31 with SMD_12X5MM Jedec type<br>Rearranged Mem U5,U7,U8,and U4 to be on the same pages<br>Added Other TMDS DVI connector with Hot Plug detect<br>Changed Pri VGA connector to SLIM_MTG                                                                                                                                                                                                                                                                          |
| X00 - 12/11/02: | Swapped out J4 2X5 with 1X10 Header<br>Added two 200 ohm CLK term. Resistors<br>Added 2nd TMDS Diff Spacing Constraints<br>Added Power Supply I, II, and III Spacing Constraints<br>Bracket Changed for Correct Jedec Type<br>Changed C571,C567,C562 to 7343 pkg to fit under FANSINK                                                                                                                                                                                              |
| X00 - 12/12/02: | Changed R223 to 95.3K, Deleted 52MM HEATSINK symbol                                                                                                                                                                                                                                                                                                                                                                                                                                |
| X00 - 12/16/02: | Added additional decoupling caps to Memory; Cleaned share footprint notes<br>Changed COMMON Attribute on a few components to NS (NO STUFF)                                                                                                                                                                                                                                                                                                                                         |
| X00 - 01/22/03: | Changed a few Rset values page 8, Crystal cap values, TV out ind value<br>added 2 res for USER_0 Strap (Apple), NVVDD changed D31, 12V_EXT to 5V_EXT<br>NVVDD changed a few Compensation component values, Added Optional Linear for A3V3                                                                                                                                                                                                                                          |
| X00 - 01/23/03: |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| X00 - 01/29/03: | Removed FBVDD ISL6529 and Linear Reg for A3V3 and Current Share<br>Changed stuff option NVDD33 reg from 3V3 to A3V3. Changed VGA conn to Regular.<br>NVVDD Supply changes: L27, C588, C586, C587, C584, added two share footprint ALE's<br>Changed a few other Power supply component values but no pkg changes.<br>Changed VGA / DVI-I conn. to a Slim VGA, Removed J9 Link C DVI-I and Link C components.<br>Changed TV in/out Inductors, deleted 2 filter caps on tuner header. |
| 01/30/03:       | Added 2 Strap resistors for PCI_DEVICE[3] GLbond.                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 02/03/03:       | Changed Current Share circuit to 0805 size, Change D30 and D33 diodes to FETS.                                                                                                                                                                                                                                                                                                                                                                                                     |
| 02/04/03:       | Deleted NVDD33 Linear not needed because no amplitude DDR-1 spec. violation.<br>Moved AGPSTOP pull-up to A3V3 from NVDD33. Added CGND2 to J3.25,R121,R94.<br>Changed Current Share Net Names and Changed BKT1 Jedec type.                                                                                                                                                                                                                                                          |
| 02/04/03:       | AGPSTOP R to net 3V3, R121 back to CGND, J2.16 to CGND2, fixed all un-named nets.                                                                                                                                                                                                                                                                                                                                                                                                  |
| 02/05/03:       | Modified BRK1 for correct Jedec type and NVPN, Current share R value change                                                                                                                                                                                                                                                                                                                                                                                                        |
| 02/06/03:       | Added 6 more 0805 R's to NVVDD Current Share CKT.                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 02/07/03:       | Cosmetic Cleanup and Added Notes Only.                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 03/10/03:       | EMI fixes. Combine CGND to GND remove CGND to GND resistors.                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 03/11/03:       | EMI fix. Added Series Resistor to GND on TMDS IFPAIOGND and IFPBIOGND.                                                                                                                                                                                                                                                                                                                                                                                                             |
| 03/14/03:       | Moving C708 & C735 to the IFPAIOGND and IFPBIOGND nets. So at least one decoupling cap is near the ball. Changed ISL6225 VIN pin 14 to be 6225_VCC_IN_F net. This provides Feed-Forward rejection of the Input voltage variation.                                                                                                                                                                                                                                                  |
| 04/25/03:       | Added New TMDS termination to Link A, changed U509 3V3TMDS regulator to LT1117 (800ma)<br>Added bulk cap near fan connector J6 and series resistor and cap on GPIO fan control.<br>Deleted R65 and R66 IFPxiOGND resistors because it did not help EMI.<br>Changed TP4 to 52P32 size. Removed Link B from DVI connector.                                                                                                                                                           |
| 05/15/03:       | No Changes. PCB INT1 Layer change.                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

## 602-10140-0003-100 NV31 Flip Chip Schematic

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |                                                                                       |  |                            |             |      |             |
