

iPad 2 3G to wifi

R1205 can be removed directly with tweezers or soldering iron (remove the resistance, and brush the machine if it is not turned on) If you connect to iTunes and you recognize that it's iPhone mode, Then you can short circuit r1204 (if you have this resistor, don't worry about it. If you don't have this resistor at r1204 in CDMA version) Finally, open the computer, connect to iTunes, call the WiFi version data, and then swipe the computer
